

MA Monitor Arm.

User Guide

- 1. VESA Mount**
Use screws supplied to mount the monitor to the VESA plate. The MA arm is compatible with both 75mm + 100mm VESA plates.
- 2. Arm Tension**
Adjust the tension of the arm spring with an allen key so that the monitor 'floats' in all height positions. The MA will support 18" - 28" monitors weighing up to 9 kg.
- 3. Screen Tilt**
To adjust screen tilt and angle, loosen the three allen key screws that secure the ball joint. With the screen in the desired position tighten the screws again.
- 4. Release Clip**
To remove the monitor depress the latch and lift the monitor up and off.
