DIFFRIENT OCCASIONAL

LIBERTY SIDE

*Designed
by Niels Diffrient*

Recognised as the father of ergonomics, legendary designer Niels Diffrient focused on the human experience to inspire innovative products. His work has spanned generations, consistently looking past trends to reinvent the tools we use for daily living.

With an academic foundation in design and architecture and a degree from Cranbrook Academy, Diffrient channels his knowledge of engineering, architecture, and human factors into the creation of highly functional and aesthetically timeless designs.

The Humanscale Design Studio, based in New York City, abides by the philosophy that good design achieves more with less. Function, simplicity, and longevity, and sustainability are at the core of all our designs. When thinking through the design and manufacturing of each product, we carefully consider the materials and resources used, in aim of creating an overall Net Positive impact.

Uncompromising performance-centric design in its purest form is at the heart of every Humanscale solution. Each of our ergonomic products is designed for maximum comfort, a long serviceable life and a minimal environmental footprint. Our simple designs have intuitive features and fewer manual controls, making them easier to use and without sacrificing a stylish aesthetic.

Humanscale®
