

AWM. AMAROO WORLD ONE

WORLD ONE

By Humanscale

Like all Humanscale chairs, the World One's design eliminates the need for traditional mechanisms by using the laws of physics and the sitter's body weight to offer a perfect recline. World One features armrests that are attached to the back of the chair and move with the user, providing custom comfort throughout the workday.

A high-value task chair with minimal parts, World One was built with longevity in mind to look as good in ten years as it does today.

The Humanscale Design Studio, based in New York City, abides by the philosophy that good design achieves more with less. Function, simplicity, and longevity, and sustainability are at the core of all our designs. When thinking through the design and manufacturing of each product, we carefully consider the materials and resources used, in aim of creating an overall Net Positive impact.

Uncompromising performance-centric design in its purest form is at the heart of every Humanscale solution. Each of our ergonomic products is designed for maximum comfort, a long serviceable life and a minimal environmental footprint. Our simple designs have intuitive features and fewer manual controls, making them easier to use and without sacrificing a stylish aesthetic.

Humanscale®

WORLD ONE

World One is an updated version of Niels Diffrient's renowned World chair, the most minimal, yet fully functional task chair ever made.

5 | AWM AMARCO

Perfect for dynamic workspaces.

Orange, NSW
Liberty Task Chair

Featuring the same innovative tri-panel mesh backrest and weight-sensitive recline as its predecessor, World One is a cost-effective solution that delivers highly engineered ergonomic support and the ultimate user-friendly sitting experience.

FEATURES

CUSTOMISED FIT

Tri-panel, non-stretch mesh construction creates body-fitting contours and self-adjusting lumbar support for an automatic, customised fit.

SUPPORTIVE AND ADJUSTABLE

Provides appropriate support and automatic resistance regardless of user's size. Size-adjustable to fit the widest range of body sizes.

ALL BODY TYPES

Frame-less front edge eliminates contact stress behind the knee and designed for users up to 135 kg.
