DRUM + BASE WORKSTATION

The Drum+Base Workstation seamlessly integrate the renowned Drum+Base system into open-plan spaces, providing exceptional quality and design flexibility to suit your workspace needs. It comes in the back-to-back configuration with integrated power and data reticulation for a clean and minimal appearance. Compatible with various power and data modules and monitor arm options, the Drum+Base Workstation allows for customisation to bring your office design to life.

PROUDLY AUSTRALIAN

At AWM Amaroo, our pride and passion drive our dedication to Australian manufacturing. From our design process to final production, we ensure that every product is crafted with 100% Aussie-born quality.

As a locally-based company, we are committed to delivering bespoke products that reflect the excellence of Australian craftsmanship.

LINAK Headquarters in Guderup, Denmark

About us

LINAK® is a family-owned business, founded on a wish to improve people’s lives. We do so by developing high-quality electric linear actuator technology that creates movement for a wealth of applications in healthcare, agriculture, industry, offices, and homes.

Since LINAK® founder Bent Jensen came up with the idea for the first electric actuator, in order to help a friend in a wheelchair, every engineer and specialist employed by LINAK have aimed to solve real-life challenges for real people. To this day our motto, ‘We Improve Your Life’, is reflected in everything we do. Whether we engage in product development, operation, or implementation of technology, we always look for ways to make it easier for our customers to engage in collaborations and partnerships with us, and ultimately improve the lives and working conditions of end users.

Linak Focus Areas

- Carbon emissions** – This includes emissions from our operations and also emissions from our value chain.
- Product design and circularity** – We focus on how our products are designed and their life cycle impact. Designing lowimpact products and adhering to circular business models.
- Resource use and circularity** – We look at how we use resources, manage packaging and waste, and make the shift to circular resources and zero waste.
- Employee engagement** – This is about how connected and committed our employees feel towards their work and LINAK®. By building a sense of community, we can boost motivation, productivity, and overall job satisfaction.
- Sustainable supply chain** – We practise sustainable procurement and supply chain management to prevent risks related to environment, human rights, and geopolitical issues.
- Market ESG expectations** – Focusing on the ability to adapt to increasing expectations on sustainability and to convert expectations into strong value propositions.

Motor housing column systems

There is an increasing global focus on ergonomics at the workplace. This is particularly true in jobs where employees sit or stand still for the majority of the day. Many scientific studies show that changing posture frequently helps improve employees’ health and enables them to stay productive throughout the day. Responsible leaders pay close attention to this and install height adjustable desks and/or workstations for the employees. LINAK actuators will enable you to offer benefits such as:

- Flexible design and easy installation
- Smooth parallel drive and ultra-quiet operation
- Durable lifting columns made by an experienced partner.
