

AWM. AMAROO LIBERTY

LIBERTY

*Designed
by Niels Diffrient*

Recognised as the father of ergonomics, legendary designer Niels Diffrient focused on the human experience to inspire innovative products. He revolutionised task seating by inventing a chair that adjusts to the sitter, rather than making the sitter adjust to the chair.

Liberty is Planet Positive. Its materials are free of harmful chemicals, is made with ocean plastic (for Liberty Ocean), post-consumer recycled content, and produced in TRUE Zero Waste facilities. Each Liberty chair produced leaves the world better off by positively impacting energy, water, and carbon in the environment.

The Humanscale Design Studio, based in New York City, abides by the philosophy that good design achieves more with less. Function, simplicity, and longevity, and sustainability are at the core of all our designs. When thinking through the design and manufacturing of each product, we carefully consider the materials and resources used, in aim of creating an overall Net Positive impact.

Uncompromising performance-centric design in its purest form is at the heart of every Humanscale solution. Each of our ergonomic products is designed for maximum comfort, a long serviceable life and a minimal environmental footprint. Our simple designs have intuitive features and fewer manual controls, making them easier to use and without sacrificing a stylish aesthetic.

Humanscale®

LIBERTY

Designer Niels Diffrient replaced the locks, knobs and levers that are under older generation chairs with your body weight and the laws of physics. It's almost as if it were made for the sitter. This means you can move effortlessly from one position to another.

5 | AWM AMARCO

Perfect for dynamic workspaces.

Orange, NSW
Liberty Task Chair

Humanscale's Liberty Task chair is an intelligent mesh task chair engineered to provide automatic lumbar support for every user, as well as offering simplicity and complete ease of use.

ERGONOMIC FEATURES

Encourages Movement

Liberty was engineered to automatically adjust to whoever sits in it, instantly accommodating each user regardless of size and weight. Because it has no manual adjustments and features Humanscale's weight-sensitive recline, the user can move easily and without restrictions.

Effortless Recline

Liberty's intelligent mechanism-free recline uses the laws of physics and the sitter's weight to automatically provide the perfect amount of support through the full range of recline. Without manual controls to adjust, the user can change postures effortlessly throughout the day.

Custom Fit

The Liberty Task Chair comes either with or without armrests. With the choice of fixed or adjustable armrests that connect to the backrest of the chair.

LIBERTY

PATENTED FORM SENSING MESH™

Inspired by clothing design and combined with low stretch mesh, ensuring a personalised fit and maximum adaptability. Unlike traditional single-panel mesh chairs, Form Sensing Mesh takes on the exact shape of the sitter's back, as if it were made for them.

CERTIFIED TO 180 KG

Far exceeding almost all other chairs. This means every part is stronger, less likely to fail, and will last for decades of heavy duty use.

EXPRESS YOURSELF

Choose over 300+ shades to find your perfect colour match.

LIBERTY OCEAN

MADE WITH 0.9 KG OF OCEAN PLASTIC

By removing and upcycling harmful fishing nets from the ocean, Humanscale helps restore delicate ecosystems
